	Section 4. First aid measures		
Inhalation:	Move to fresh air. If symptoms persist, seek medical advice.		
	Rinse with running water and soap. Obtain medical attention if irritation persists.		
	Rinse immediately with plenty of running water (for 10 minutes), seek medical attention from a specialist.		
Ingestion:	Rinse mouth, drink 1-2 glasses of water, do not induce vomiting, consult a doctor.		
Indication of immediate medical attention and special treatment needed:	See section: Description of first aid measures		
Section 5. Fire fighting measures			
Suitable extinguishing media:	Foam, extinguishing powder, carbon dioxide.		
Specific hazards arising from the chemical:	Do not expose to direct heat.		
	Wear self-contained breathing apparatus and full protective clothing, such as turn-out go		
Special protection equipment and precautions for firefighters:	wear sen-contained breathing apparatus and fun protective crothing, such as turn-out g		

Section 6. Accidental release measures

Personal precautions:	Ensure adequate ventilation.
Environmental precautions:	Do not let product enter drains.
Clean-up methods:	For small spills wipe up with paper towel and place in container for disposal. For large spills absorb onto inert absorbent material and place in sealed container for disposal. Dispose of contaminated material as waste according to Section 13.

Section 7. Handling and storage

Handling:	Use only in well-ventilated areas. Gloves and safety glasses should be worn Prolonged or repeated skin contact should be avoided to minimise any risk of sensitisation.
Storage:	Keep away from heat and direct sunlight. Keep container in a well ventilated place. Store above 32° F. (0° C) Store below 90°F. (32.2°C)

Section 8. Exposure controls / personal protection

Components with specific control parameters for workplace:

TITANIUM DIOXIDE 13463-67-7	Value type	Time Weighted Average (TWA):

	Remarks	ACGIH
TITANIUM DIOXIDE 13463-67-7	Value type	Time Weighted Average (TWA):
	mg/m ³	10
	Remarks	MY OEL

Respiratory protection:	Ensure adequate ventilation. An approved mask or respirator fitted with an organic vapour cartridge should be worn if the product is used in a poorly ventilated area Filter type: A (EN 14387)
Hand protection:	Chemical-resistant protective gloves (EN 374). Suitable materials for short-term contact or splashes (recommended: at least protection index 2, corresponding to > 30 minutes permeation time as per EN 374): nitrile rubber (NBR; >= 0.4 mm thickness) Suitable materials for longer, direct contact (recommended: protection index 6, corresponding to > 480 minutes permeation time as per EN 374): nitrile rubber (NBR; >= 0.4 mm thickness) This information is based on literature references and on information provided by glove manufacturers, or is derived by analogy with similar substances. Please note that in practice the working life of chemical-resistant protective gloves may be considerably shorter than the permeation time determined in accordance with EN 374 as a result of the many influencing factors (e.g. temperature). If signs of wear and tear are noticed then the gloves should be replaced.
Eye protection:	Safety glasses with sideshields or chemical safety goggles should be worn if there is a risk of splashing. Protective eye equipment should conform to EN166.
Body protection:	Wear suitable protective clothing. Protective clothing should conform to EN 14605 for liquid splashes or to EN 13982 for dusts.
Engineering controls:	Ensure good ventilation/extraction.
Hygienic measures:	Good industrial hygiene practices should be observed. Do not eat, drink or smoke while working. Wash hands before work breaks and after finishing work.

Germ cell mutagenicity:

Titanium dioxide	Result	negative
13463-67-7	Type of study / Route of administration	bacterial reverse mutation assay (e.g Ames test)
	Metabolic activation / Exposure time	with and without
	Method	OECD Guideline 471 (Bacterial Reverse Mutation Assay)
Titanium dioxide	Result	negative
13463-67-7	Type of study / Route of administration	in vitro mammalian chromosome aberration test
	Metabolic activation / Exposure time	with and without
	Method	OECD Guideline 473 (In vitro Mammalian Chromosome Aberration Test)
Titanium dioxide	Result	negative
13463-67-7	Type of study / Route of administration	mammalian cell gene mutation assay
	Metabolic activation / Exposure time	with and without
	Method	OECD Guideline 476 (In vitro Mammalian Cell Gene

Section 13. Disposal considerations

Method of disposal:Dispose of in accordance with local and national regulations.
Contribution of this product to waste is very insignificant in comparison to article in
which it is usedPackagingAfter use, tubes, cartons and bottles containing residual product should be disposed of as
chemically contaminated waste in an authorised legal land fill site or incinerated.
Disposal must be made according to official regulations.

Section 14. Transport information

General information:

Product

Not hazardous according to RID, ADR, ADN, IMDG, IATA-DGR.

Section 15. Regulatory information

Regulatory Information: Occupational Safety and Health (Classification, Labelling and Safety Data Sheet of Hazardous Chemicals) Regulations 2013 [P.U.(A) 310/213] Industry Code of Practice on Chemicals Classification and Hazard Communication

Global inventory status:
